Education

NBN Sinhgad Technical Institutes Campus, Pune	CGPA: 9.08/10
<i>Bachelor of Engineering in Information Technology</i>	<i>2023 – Present</i>
Maharani Usharaje Holkar Junior College, Chandwad	Percentage: 83.17%
<i>XII Maharashtra State Board</i>	<i>2021 – 2022</i>
Jawahar Navodaya Vidyalaya, Nashik	Percentage: 91%
<i>X CBSE</i>	<i>2019 – 2020</i>

Experience

CODTECH IT SOLUTIONS Jan 2026 – Apr 2026

Java Full Stack Development Intern

- Led a team of 4 interns to develop **20+ Spring Boot REST APIs**, integrating them with a **React** frontend to deliver end-to-end application functionality.
- Implemented **JWT-based** authentication with role-based authorization, securing **20+** API endpoints and enabling safe user login and access control.
- Designed and optimized **MySQL** database operations across **10+** entities, implementing **CRUD** functionality and seamless backend integration using Spring Data JPA.

Projects

QueueLess | *React.js, Spring Boot, MySQL, Docker, Redis* 🔗

- Built QueueLess, a full-stack smart queue management platform using React, Spring Boot, and MySQL, featuring 3 user roles, **25+** JWT-secured REST APIs, and remote queue booking.
- Engineered a real-time departure engine using **WebSocket/STOMP** and **self-hosted OSRM**, reducing waiting time by up to **70%**.
- Designed a Dockerized **4-service architecture** (Spring Boot, React, MySQL, Redis) for a scalable universal queue platform with single-command deployment.

DocMind AI | *Python, LangChain, ChromaDB, Sentence-Transformers, Ollama, Streamlit, FastAPI* 🔗

- Engineered a production-grade **RAG** system with hybrid retrieval (**BM25 + vector search**), achieving **95%** document relevance and **< 2% hallucination** through dual-layer citation validation.
- Built an intelligent document assistant processing **10,000+** document chunks with cross-encoder re-ranking, reducing LLM API costs by **90%** using local **Ollama** while maintaining enterprise-grade accuracy.
- Developed a full-stack RAG application with Streamlit, REST APIs, and **semantic search**, supporting source citations and configurable relevance thresholds with **< 1.2s** query latency.

Technical Skills

Languages: Java | Python | C++ | C | SQL

Technologies: React.js | Spring Boot | MySQL | Docker | LangChain | Streamlit | Ollama | FastAPI

Programming Concepts: Object Oriented Programming | Data Structures & Algorithms

Core CS Subjects: Operating System | Database Management System | Computer Networks

Developer Tools: Github | Visual Studio Code | IntelliJ IDEA

Certifications/Achievements

- **Frontend Developer (React)** certification from **HackerRank**, demonstrating proficiency in building responsive and interactive web applications using **React**. - [See certificate](#)
- **Java** certification from **OneRoadmap**, validating a strong understanding of **core Java concepts and principles**. - [See certificate](#)
- **SQL (Advanced)** certification from **HackerRank**, showcasing expertise in **complex SQL queries and database management**. - [See certificate](#)
- Completed the **AI & ML** course by **Edunet Foundation**, gaining hands-on experience in **Machine Learning & Deep Learning** concepts and model development. - [See certificate](#)
- Completed a **15-hour Generative AI** course authorized by **Adobe** and offered through **Coursera**, gaining practical AI skills. - [See certificate](#)
